PROJECTS

Profit.co - Product Website (WordPress)
WordPress website for a SaaS product, integrated with the company's CRM, Stripe payment gateway, and various third-party services. Optimized the website for speed and performance, ensured that it was mobile-friendly and accessible, and provided ongoing maintenance and support, including security updates and bug fixes.

Gobumpr-Clone (Laravel)
Laravel-based service booking website for vehicles, with an admin backend and PayUmoney payment gateway.

Btc Doubler (Core PHP)
Simple Core PHP website for doubling the value of Bitcoin (BTC).

Email Verifier (Laravel)
Laravel-based web application for single and bulk email verification for business advertisement purposes through subscription.

School Management System 2 (CodeIgniter)
Nigeria-based school management system with features such as fees maintenance, online courses, and PayPal payment gateway.

Adtraams ADMIN Backend (CodeIgniter) - adtraams.com
CodeIgniter-based food delivery application for Karur, Tamil Nadu, India, with features to maintain orders, products, and delivery persons.

Festival Discount - Hetlaatstekaartje.nl (Laravel)
Laravel-based ticket booking application for festivals and entertainment centers in the Netherlands, with discounts and offers.

School Management System (CodeIgniter)
CodeIgniter-based web application for maintaining school fees and attendance of students and teachers.

Adtraams WordPress Site
WordPress e-commerce application (1 month of experience).

Crowdfunding (Laravel)
Junior developer on a Laravel-based crowdfunding application.

Blooming Day Spa (Core PHP)
Front-end integration of dynamic data from databases (features, types, pros, and cons of massages) for a spa website in Madurai, India.

Appointment Organiser (Core PHP)
Fixing issues on a Core PHP-based project for a driving school in the US, which explains driving lessons and schedules practical and theory classes.
